

is a Substitute Appeal Brief which in which the various defects alleged in the Office Action have been remedied.

According to the Office Action, the Appeal Brief did not contain a concise explanation of the invention defined in the claims, referring specifically to the page and line numbers and to the drawings by reference numbers as required by 37 C.F.R. § 1.192(c)(5). Further, the Office Action states that "[a] 'unique identifier' is not present in the claims on Appeal." Section I(E) of the Substitute Appeal Brief is believed to now comply with 37 C.F.R. § 192 with respect to these alleged defects. In particular, Section I(E) of the Substitute Appeal Brief includes a discussion of the specific elements in each independent claim that are shown in Section I(H) to be lacking from the prior art upon which the § 102 rejections are based.

The Office Action further alleges that the Appeal Brief did not contain a statement of the status of all claims, pending or canceled, and did not identify the claims appealed as required by 37 C.F.R. § 1.192(c)(3). Section I(C) of the Substitute Appeal Brief is believed to now comply with 37 C.F.R. § 1.192(c)(3).

Finally, the Office Action alleges that the Appeal Brief did not include a statement that the grouping of claims 1-3, 5-8, 9-13, and 15-24 does or does not stand or fall together or present reasons in support thereof as required by 37 C.F.R. § 1.192(c)(5) and (c)(7). Section I(G) of the Substitute Appeal Brief is believed to now comply with these requirements.

CONCLUSION

In view of the foregoing, consideration of the Substitute Appeal Brief is respectfully requested, such that the appeal proceedings may commence.

Date: 24-JAN-2001

Respectfully submitted,

Hugh R. Kress
